COURSE OVERVIEW

School teams will address content in the following areas: Roles/responsibilities; effective communication; supporting your CEO—How do these and other fundamentals shift when your organization is managing a crisis?

Schools will analyze their own governance structure and operations, including their interactions with the HoS, identify aspects that need to be addressed, and draft an action plan to make needed changes.

Schools will participate in three sessions, with Session #2 being an individualized coaching session directly with the course consultant.
